

Want to wear a Freestyle Libre sensor?

FreeStyle LibreLink – NZ

Abbott Diabetes Care

Abbott Labs

#19 in Medical

★★★★★ 3.9 • 33 Ratings

Free

Abbott is offering clinicians the opportunity to experience wearing a Freestyle Libre sensor.

A Freestyle Libre Reader won't be issued for this program, consequently the clinician would be required to use their mobile phone to scan the sensor.

Step One: Download LibreLink App

Step Two: Sign in with **PERSONAL** email address

Step Three: Follow the prompts through set up

Note: If the phone is not able to download the Freestyle LibreLink App, this is a clear indication that the phone DOES NOT have the correct specifications to communicate with the NZ Freestyle Libre sensor
